

# HÖRNET

Hornets build large nests that are shaped like a football. Don't disturb their nests because they will attack and sting! You can find out more about hornets at [www.terminix.com](http://www.terminix.com).

# SPIDER

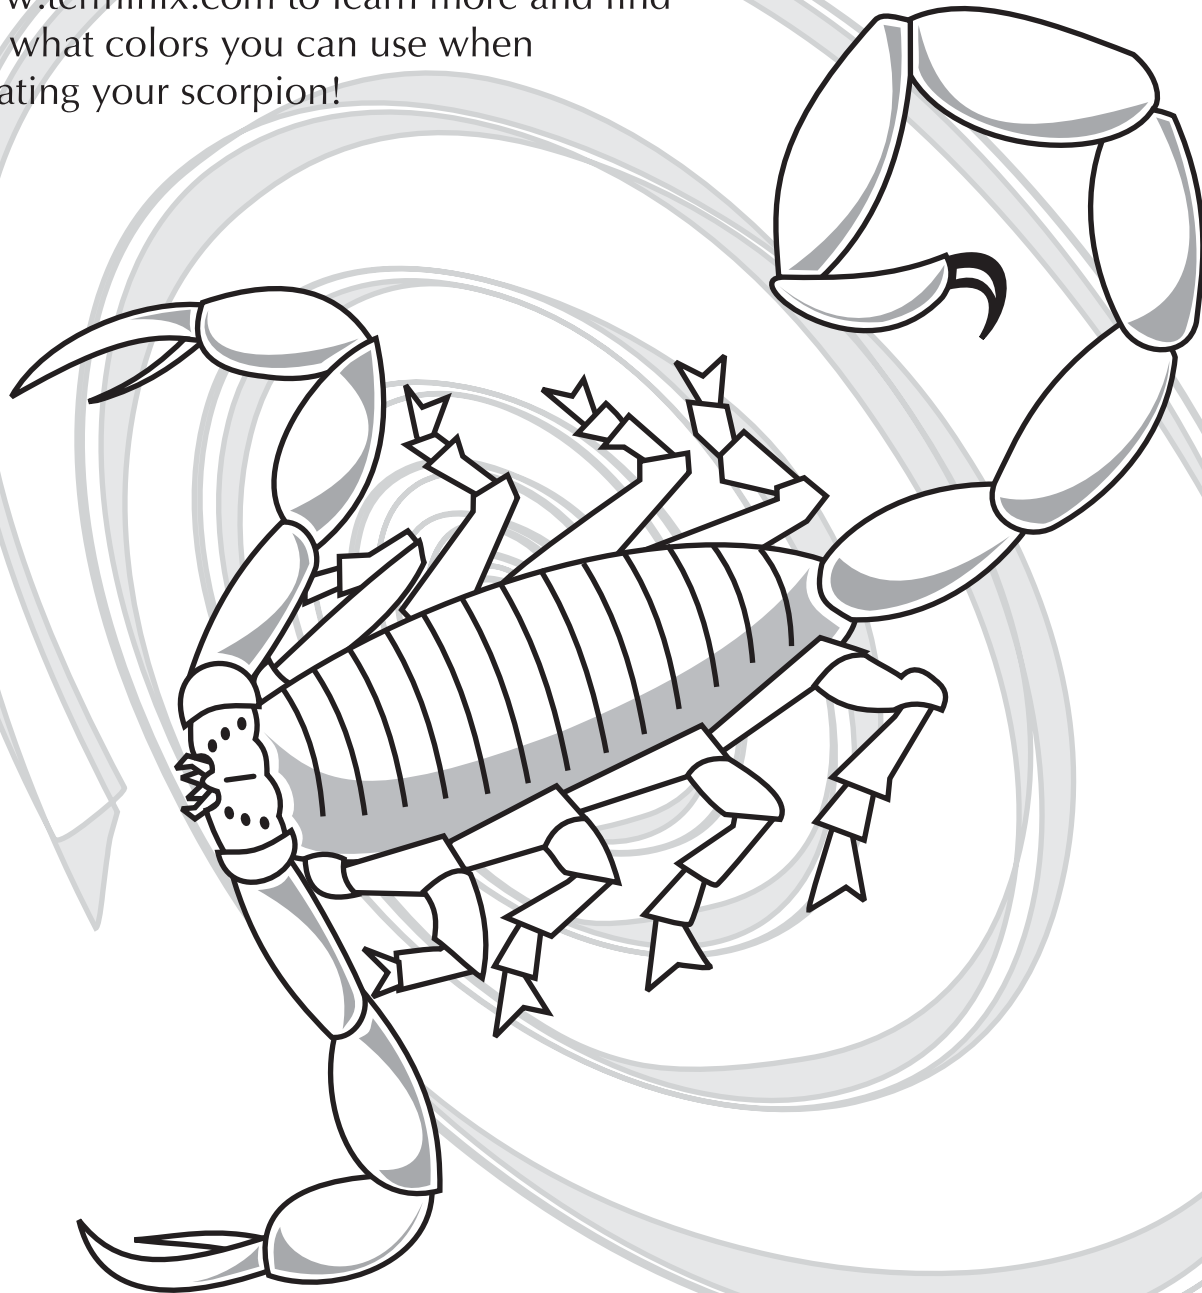

Spiders help control the world's insect population. Check out the Terminix Pest Library at [www.terminix.com](http://www.terminix.com) to find out which spider weaves the webs we see inside houses, schools and other buildings.

**TERMINIX** kids™

# SCORPION

Scorpions come out at night and look for insects to eat. They can pinch, but it's their stinger you really need to watch out for. Go to the Terminix Pest Library at [www.terminix.com](http://www.terminix.com) to learn more and find out what colors you can use when creating your scorpion!

# HONEY BEE

Honeybees sure are busy bees! For each pound of honey they make, they collect nectar from up to two million different flowers. Check out the Terminix Pest Library at [www.terminix.com](http://www.terminix.com) to see what you should do if you spot a nest of honeybees.
